

Medication Policy

At **1066 kids club** we promote the good health of children attending holiday clubs and take necessary steps to prevent the spread of infection (see sickness and illness policy). If a child requires medicine we will obtain information about the child's needs for this, and will ensure this information is kept up to date.

We follow strict guidelines when dealing with medication of any kind in the setting and these are set out below.

Medication prescribed by a medical professional

- Prescription medicine will only be given when prescribed by the above and for the person named on the bottle for the dosage stated
- Medicines must be in their original containers with their instructions printed in English and must be dated
- Those with parental responsibility for any child requiring prescription medication should hand over the medication to the most appropriate member of staff who will then note the details of the administration on the appropriate form and another member of staff will check these details
- Those with parental responsibility must give prior written permission for the administration of each and every medication. However, we will accept written permission once for a whole course of medication or for the ongoing use of a particular medication under the following circumstances:
 1. The written permission is only acceptable for that brand name of medication and cannot be used for similar types of medication, e.g. if the course of antibiotics changes, a new form will need to be completed
 2. The dosage on the written permission is the only dosage that will be administered. We will not give a different dose unless a new form is completed
 3. Parents must notify us IMMEDIATELY if the child's circumstances change, e.g. a dose has been given at home, or a change in strength/dose needs to be given.
- 1066 kids club will not administer a dosage that exceeds the recommended dose on the instructions unless accompanied by written instructions from a relevant health professional such as a letter from a doctor or dentist.

- The parent must be asked when the child has last been given the medication before coming to 1066 kids club; and the staff member must record this information on the medication form. Similarly, when the child is picked up, the parent or guardian must be given precise details of the times and dosage given throughout the day. The parent's signature must be obtained at both times
- At the time of administering the medicine, a senior member of staff will ask the child to take the medicine, or offer it in a manner acceptable to the child at the prescribed time and in the prescribed form. (It is important to note that staff working with children are not legally obliged to administer medication)
- If the child refuses to take the appropriate medication, then a note will be made on the form
- Where medication is "essential" or may have side effects, discussion with the parent will take place to establish the appropriate response.

Non-prescription medication (*these will not usually be administrated*)

- 1066 kids club will not administer any non-prescription medicine eg calpol.
- If 1066 kids club feels the child would benefit from medical attention rather than non-prescription medication, we reserve the right to refuse child care until the child is seen by a medical practitioner
- If any child is brought to 1066 kids club in a condition in which he/she may require medication sometime during the day, the manager will decide if the child is fit to be left at the holiday club. If the child is staying, the parent must be asked if any kind of medication has already been given, at what time and in what dosage and this must be stated on the medication form
- 1066 kids club DOES NOT administer any medication unless prior written consent is given for each and every medicine.

Staff medication

1066 kids club staff have a responsibility to work with children only where they are fit to do so. Staff must not work with children where they are infectious or too unwell to meet children's needs. This includes circumstances where any medication taken affects their ability to care for children, for example, where it makes a person drowsy.

If any staff member believes that their condition, including any condition caused by taking medication, is affecting their ability they must inform their line manager and seek medical advice. *1066 kids club manager/person's line manager/registered provider will decide if a staff member is fit to work, including circumstances where other staff members notice changes in behaviour suggesting a person may be under the influence of medication. This decision will include any medical advice obtained by the individual or from an occupational health assessment.

Where staff may occasionally or regularly need medication, any such medication must be kept in the person's locker/separate locked container in the staff room where staff may need easy access to the medication such as an asthma inhaler. In all cases it must be stored out of

reach of the children. It must not be kept in the first aid box and should be labelled with the name of the member of staff.

Storage

All medication for children must have the child's name clearly written on the original container and kept in a closed box, which is out of reach of all children. Emergency medication, such as inhalers and EpiPens, will be within easy reach of staff in case of an immediate need, but will remain out of children's reach. Any antibiotics requiring refrigeration must be kept in a fridge inaccessible to children.

All medications must be in their original containers, labels must be legible and not tampered with or they will not be given. All prescription medications should have the pharmacist's details and notes attached to show the dosage needed and the date the prescription was issued. This will all be checked, along with expiry dates, before staff agree to administer medication.
